

RECORD GROUP 15

Frank Seaver College of Science and Engineering,
1929 to present day

Separating from the College of Arts and Sciences, engineering studies became the College of Engineering in 1935. With the creation of a College of Liberal Arts in 1972, natural sciences curricula from the Arts and Sciences College were assigned to this school to create the present day College of Science and Engineering. The records of this group include college publications, correspondence and report files for the Office of the Deans, chair and faculty files and student papers. The major departments include Biochemistry, Computer Science, Engineering, Mathematics, Natural Science and Physics.
